**Organization** MITRE

**E Mail Address** rgroff@mitre.org

**Document** DID 313 ICD

<b>RID ID</b>	<b>PDR</b>	308
<b>Review</b>	CSMS	
<b>Originator Ref</b>	ICD 1.2	
<b>Priority</b>	2	

**Section** Section 5.1

**Page** NA

**Figure Table** NA

**Category Name** Design-CSS

**Actionee** HAIS

**Sub Category**

**Subject** Use of CSS services should be the default standard for ECS

## **Description of Problem or Suggestion:**

The fourth paragraph ("Not all communications . . .") undermines the integrity of the entire ECS architecture. If the ECS is to be maintainable and evolvable, applications cannot be "free to agree to other means of communication [than CSS]." There may be some well justified cases where bypassing the CSS mechanisms is justified, but these should be kept to a minimum and require the highest level of justification and approval.

## **Originator's Recommendation**

Delete the fourth paragraph of Sec 5.1, or revise to present a much higher standard of justification required to bypass CSS services.

**GSFC Response by:**

**GSFC Response Date**

**HAIS Response by:** Forman

**HAIS Schedule**

**HAIS R. E.** Winston

**HAIS Response Date** 5/2/95

Concur, it is the intent of ECS to specify use of the CSS interface mechanisms. Details will be provided through implementation directives. Exceptions will require justification and approval by the CCB. The CSS ICD DID 313 will be revised by CDR to reflect this.
